Pressure map: where each team presses

Argentina: 167 pressures · 31 in the final third (19%)

France: 194 pressures · 45 in the final third (23%)

Gaussian-smoothed count of pressure events (sigma = 6 yd). Contour bands mark 28%, 48%, 70% and 88% of each team's own peak density, so the lines describe pressing shape rather than volume. Each team is orientated to attack left-to-right. Data provided by StatsBomb.
